Manman Lu

manmanl@andrew.cmu.edu · linkedin.com/in/manman-lu-ai

AI product manager with 13+ years across Google, McKinsey, and Sony, bridging user needs, emerging AI capabilities, and product execution. Grounds product decisions in user research and turns them into evaluation criteria, human-in-the-loop workflows, and AI products taken from discovery through launch.

EXPERIENCE

Carnegie Mellon University × Honda Research Institute · Pittsburgh, U.S. 08/26 – Present
Lead Product Manager, Research2Code Capstone

- Evolved a terminal-based research-to-code prototype into a browser-based, self-hosted multi-agent system that turns papers into runnable code, adding user research and workflow validation beyond the original prototype
- Led user discovery and competitive analysis; uncovered an underserved need to adapt paper-derived code into existing product environments, refocusing the product from academic reproduction to corporate research
- Defined evaluation criteria across execution, faithfulness, explainability, and application fit; partnered with two ML engineers on requirements and monitoring that flags AI-introduced datasets, parameters, and assumptions

Intrinsic (Alphabet) · Mountain View, U.S. 05/26 – 08/26
User Experience Researcher Intern

- Proposed and led developer research as HMI development shifted toward external partners; studied SDK workflows and AI coding-agent usage across seven robotics developers in the U.S. and Germany, identifying a shift toward code-first development and shaping SDK and tooling direction with the Group PM
- Synthesized frontline operator observations and interviews into 20 prioritized product and engineering requirements, ranking issues by impact on task completion and aligning engineering on the highest-value fixes

McKinsey & Company · Tokyo, Japan 01/22 – 12/25
Director, Digital Innovation and Customer Experience

- Led 0-to-1 development of an LLM- and RAG-powered due-diligence assistant for trading houses and venture investors, translating user workflows into MVP scope, evaluation criteria, and engineering priorities
- Redesigned the workflow after early testing showed fully generated reports created excessive review burden; shifted to hypothesis-driven summaries and targeted evidence verification, contributing to a customer-reported 60%+ reduction in report preparation time
- Designed human-in-the-loop interfaces separating supported facts, missing evidence, and model-generated implications, and proposed a user-correction loop to capture errors and improve future outputs
- Led a cross-functional marketplace launch across Engineering, IT, Commercial, Legal, and Compliance, resolving dependencies to launch six months early, saving $740K and supporting $70M in projected three-year revenue

KPMG Consulting · Tokyo, Japan 10/18 – 03/20
Manager, Digital Innovation

Sony Corporation · Tokyo, Japan 04/12 – 10/18
Product Manager, Consumer Audio | Consumer Research Manager

- Owned product requirements and cross-functional trade-offs for 10+ consumer audio products from concept through mass production, translating customer insights into product decisions; contributed to 6% U.S. market-share growth and sustained 42% share in Japan
- Proposed a compact subwoofer concept and partnered with engineers to shrink the enclosure while preserving bass performance in user testing; secured Best Buy buy-in and reached 200K+ units in annual global sales

EDUCATION

Carnegie Mellon University, Tepper School of Business · Pittsburgh, U.S. Expected 12/26
M.S. Product Management | Merit-based Scholarship

Coursework: Human-AI Interaction, AI-Augmented Design, AI Product Management, Managing People and Teams

Keio University · Tokyo, Japan
M.S. Media Design (HCI & Applied Ethnographic Research) | Dean's List Nominee

Communication University of China · Beijing, China
B.A. International Communication | Outstanding Thesis Award

SKILLS

AI Product Strategy, LLM Workflows & Agents, AI Evaluation, Human-in-the-Loop Design, Prompt Design & Iteration, Product Discovery, User & Developer Research, Python, SQL
